foster-mfg.com

The **Ideal Tridon Group** has comprehensive offerings of highly engineered critical components used in supporting, securing, and connecting the movement of air, fluid, and electricity in critical applications. We are a growing family of brands, all known for their superior subject matter expertise.

Our Products

Hose clamps • Strut & Support Systems • Hose Fittings & Couplings • & more!

Our Values

Devotion to Customers • Passion for Growth • Outstanding Quality

QUICK DISCONNECTS

Manual

Manual sockets require manual retraction of the sleeve to both connect and disconnect the plug. Ball Lock (BL) is an optional feature available on manual sockets. After connection, the sleeve is rotated locking the coupler against accidental disconnect.

Automatic

Automatic sockets accept the plug by simple insertion into the socket and do not require retraction of the sleeve to connect. Sleeve Lock (SL) is an optional feature on automatic sockets to prevent accidental disconnect. It is functionally the same as the Ball Lock (BL) on manual sockets.

Safety Coupler

Safety sockets are a variation of automatic operation. The socket accepts the plug by insertion. The sleeve is moved straight forward to lock and turn on the air. The sleeve is moved back by rotating first to the left and then to the right. This shuts off the supply line, exhausts the downstream line, and then releases the plug.

One-Way Shut-Off

In a "One-Way Shut-Off," only the socket has valving to shut off the flow when disconnected; it is, therefore, installed on the pressure side of the line. The plug has no valving and exhausts the downstream line at disconnect.

Two-Way Shut-Off

The "Two-Way Shut-Off" provides valving in both the socket and the plug, thereby shutting off flow at both of the disconnected ends. Originally developed for hydraulic lines, they are suitable for many other media because of the variety of metals and seal compounds offered.

Straight-Thru

"Straight-Thru" couplers, as the name implies, do not have valving in either the socket or the plug. Therefore, both ends of the line are exhausted at disconnect.

How To Select – Proper quick disconnects selection is important because of the variety of media for which they are used.

Four basic factors should be considered to assure proper selection: **Type – Operation – Flow – Media**

Type – All quick disconnects consist of two basic components – a socket and a plug. The type of coupler varies by the valving arrangements in these two components.

Operation: Refers to the action required to connect and disconnect a coupler. Operation is a function of sockets only and does not vary for plugs.

Flow: The most important factor in properly sizing couplers is flow. Flow data is given throughout the catalog for industrial interchange design couplers, as well as many of Foster's interchanges for competitors' non-standard designs. Where

flow information is not shown, it is the same as the originating competitors' non-standard design. Most One-Way Shut-Off non-standard couplers have the same flow as the same basic size industrial interchange design. All flows shown are for FPT couplers.

Media: The media flowing through the coupler will usually determine the type. Compressed air, many other gasses, and some liquids can be handled by One-Way Shut-Off couplers. Hydraulic fluids as well as many other liquids and some gasses require Two-Way Shut-Off. Straight-Thru couplers are suitable where there is no pressure in the line at connect or disconnect and loss of media at disconnect does not matter.

Pressurized lines employing quick-disconnect couplers should be considered potentially hazardous and **must be used with safety in mind**. Proper selection and use of Foster products will help you maintain a safe working environment for your personnel, your equipment, and your products.

Foster's quick-disconnect couplers are precision devices—do not modify, strike, or otherwise abuse the coupling halves. Never exceed their pressure or temperature limits and always protect the hose and coupler assembly from moving equipment.

Be cautious when moving pressurized hoses as some types of quick-disconnect couplers may unintentionally disconnect if the coupler encounters an obstacle as the hose is dragged. The pressurized media subsequently escaping from the freed line can force the hose assembly to violently whip about, possibly causing personal injury, equipment/product damage, and economic loss. Foster couplers and plugs designed to

minimize hose-whip hazards should be used whenever the risk is present, and personnel must be instructed to maintain a firm grip on both coupler halves when connecting or disconnecting pressurized lines.

Above all, always wear appropriate personal-protection equipment and safety glasses when working with, or near, pressurized lines utilizing quick-disconnect couplers.

Described below are several products offered by Foster Manufacturing Company that are designed to minimize the possibility of inadvertent disconnection and dangerous hose-whip:

- Couplers -

Sleeve Guard Sockets:

Sleeve guard sockets (models SG3 and TF3) employ a rigid flange at the nose of the socket that protects the sleeve from accidental retraction if the coupler encounters an obstacle while the hose is being dragged or moved.

Sleeve Locking Options:

BL and SL options employ a ball or pin to restrict sleeve retraction and are available on all Foster manual and automatic couplers having retractable sleeves. Couplers with the BL or SL designation are constructed with sleeves having a slot that must be aligned with a ball or pin before the sleeve is allowed to retract. Rotating the sleeve 180 degrees so the slot is not aligned with the ball or pin will minimize the chance of accidental sleeve retraction.

Twist-lock Sockets:

Our twist-lock couplers (FRL series and SHD series) offer another option for minimizing the chance of hose-whip. These models are very resistant to accidental disconnection because the sleeves must be rotated, rather than retracted, to release the plug. In addition, the FRL and SHD couplers are push-to-connect automatic models designed for easy operation when using gloved hands.

Safety Vent Sockets:

Foster SV series safety-vent sockets are "zero pressure" connect/disconnect type couplers designed to safely vent downstream pressure prior to disengaging the plug. Besides being nearly effortless to connect and great for hose use, SV sockets are especially useful for single-hand operation when they are mounted to hard lines such as an overhead air drop. Once inserted into the SV socket, the plug is lightly gripped and will stay in place allowing the operator to use the same hand to actuate the sleeve to the "on" position. As the sleeve is being moved to the "on" position, the SV socket will securely lock the plug in place before flow begins. Foster SV sockets can also be used as a 3-way valve to turn off the flow of air and exhaust the downstream pressure without disengaging the plug. By turning and sliding the sleeve to the "exhaust" position, downstream air pressure is relieved, but the plug remains locked in place. Foster SV series sockets are the ultimate solution to accidental-disconnect hose-whip dangers.

- Plugs -

Ball Check Plugs

Ball check plugs are offered in several sizes of Industrial Interchange and FRL plugs. Ball-check plugs have a free-floating internal ball that acts as a check valve when the plug is disconnected from the coupler. The check-valve action minimizes hose-whip by causing the pressurized gas to escape slowly from the disconnected hose.

- Air Blowguns -

Foster manufactures several types of air blowgun products designed for cleaning, blow-off, inflation, and other operations. The blowguns are available with zinc or nylon bodies and we offer a variety of optional tips for nearly any use. Foster blowguns are available in OSHA* compliant and non-compliant** models to suit your particular needs.

** Blowguns that comply with OSHA regulations will limit the pressure of air exiting the gun to less than 30 psig when the tip is dead-headed. All Foster blowguns using "standard" and "safety" tips are OSHA compliant and are available with either removable threaded tips or tamper resistant crimped tips.*

*** Note: If a non-compliant blowgun/tip assembly is being used, air pressure to the gun's inlet must be regulated to less than 30 psig to meet OSHA regulations.*

- Product Selection and Training -

We strongly recommend that the end user obtain proper training before using quick-disconnect couplers, air blowguns, and other Foster products. Thoughtful analysis of the user's needs and application must be given before selecting a product.

Our dedicated employees and distributors are eager to explain the features, benefits, and proper selection of Foster products, and answer your questions regarding their correct application and safe use.

Be Safe When Selecting Quick Couplings!

! Quick disconnect couplings can fail without warning! Prior to the operation of quick coupling products, be sure to inspect and replace worn out fittings and safety devices. If a leak is detected during operation, release the pressure from the circuit before investigating the cause of the fluid leak. Do not use your fingers or skin to check for leaks, high pressure leaks of fluids can easily penetrate the skin and can cause serious injury or death.

Safe Quick Coupling Practices

- !** 1. Always wipe the coupling cavities and faces clean before connecting a coupling.
- 2. Connect coupling before installation to ensure that it works properly.
- 3. Always check the body seals before connecting a coupling.
- 4. Shut-off power source before connecting a coupling.
- 5. Always install a safety check valve on a pneumatic line and/or compressor.
- 6. Always use a safety cable on large air lines (½" lines and larger).
- 7. Always use a whip hose on hydraulic or air tools.
- 8. Use dust caps or plugs when couplings are not in use.
- 9. If the locking sleeve is inoperable, check the safety lock.
- 10. Wear eye protection while connecting or disconnecting a coupling.
- 11. Connect and disconnect at zero pressure for personal safety and maximum product life.

Unsafe Quick Coupling Practices

- !** 1. Never hit coupling valves to release trapped pressure.
- 2. Never leave couplings in the path of moving equipment.
- 3. Never use couplings near a welder, flash heat, or fire / flame sources.
- 4. Never use API modified sealants or over apply PTFE tape during installation.
- 5. Use care if you must install quick couplings onto black iron pipe.
- 6. Never hit a coupling sleeve with a hammer or blunt object.
- 7. Never overtighten a coupling connection.
- 8. Never rotate a quick disconnect coupling under pressure.
- 9. Do not overpressurize quick disconnect couplings.
- 10. Never use a hose with a quick disconnect coupling to lift a tool.

OSHA Regulations Ensure Operator Safety

Safety Cables

Safety Check Valves

Standard - 29 CFR, 1926.302 (partial):

(b)(1) Pneumatic power tools shall be secured to the hose or whip by some positive means to prevent the tool from becoming accidentally disconnected.

(b)(2) Safety Clips or retainers shall be securely installed and maintained on pneumatic impact (percussion) tools to prevent attachments from being accidentally expelled.

(b)(4) Compressed air shall not be used for cleaning purposes except where reduced to 30 PSI and then only with effective chip guarding and personal protective equipment which meets the requirements of Subpart E of this part. The 30 PSI requirement does not apply for concrete form, mill scale, and similar cleaning purposes.

(b)(5) The manufacturer's safe operating pressure for hoses, pipes, valves, filters and other fittings shall not be exceeded.

(b)(6) The use of hoses for hoisting or lowering tools shall not be permitted.

(b)(7) All hoses exceeding ½" inside diameter shall have a safety device at the source of supply or branch line to reduce pressure in case of hose failure.

Standard - 29 CFR, 1926.603 (partial):

(a)(9) Steam hose leading to a steam hammer or jet pipe shall be securely attached to the hammer with an adequate length of at least ¼" diameter chain or cable to prevent whipping in the event the joint at the hammer is broken. Air hammer hoses shall be provided with the same protection as required for steam lines.

(a)(10) Safety chains, or equivalent means, shall be provided for each hose connection to prevent the line from thrashing around in case the coupling becomes disconnected.

Canadian Registration Number (CRN) Certification

The following product series have Canadian Registration Numbers:
FHK (ISO B), FST (straight-thru), and pneumatic industrial interchange
(2-6 One-Way Shut-off).

Ontario Province – CRN No. 0H20062.5

Quebec Province – CRN No. 0H20062.56

British Columbia Province – CRN No. 0H20062.51

Saskatchewan Province – CRN No. 0H20062.56

Maritimes Province – CRN No. 0H20062.59870YTN

CAUTION: It is important that users of the Quick Release Couplers read the safety guidelines on pages 8 - 9. Improper use of products can lead to severe injury and damage to equipment.

FOSTER-MFG.COM | 866-918-3003

Foster is part of the Ideal Tridon Group. Learn more at idealtridongroup.com

(Industrial Interchange)

Type: One Way Shut-Off – Socket is valved, shutting off supply line at disconnect. Plug is un-valved, exhausting downstream line at disconnect. Install socket on pressure side of line.

Interchangeability: Standard industrial interchange design, most widely used in industry. 3 and 5 Series Automatic water service comply with A-A-59439 (formerly MIL-C-4109F). 3-4-5-6 SERIES MEET ISO 6150-B, ANSI(NFPA)T3.20.14-1990. IN ADDITION, SV SOCKETS MEET ISO 4414.

Rated Pressure: 300 PSIG; Vacuum to 27" Hg (connected) Contact Foster for higher pressure applications.

Manual: Socket sleeve must be manually retracted to connect and disconnect.

- Low cost, general purpose coupler
- Positive locking mechanism
- 65% more ball retention
- Precision leak-proof seal and heavy steel sleeve.

Automatic: Inserting the plug into the socket automatically retracts the sleeve to connect. Manually retract the sleeve to disconnect.

- One hand operation
- One piece sleeve with rear crimp
- Precision leak-proof seal
- Long wearing pin type locking mechanism
- Greater plug contact

Features:

- High flow capability for small coupler
- Precision leak-proof seal
- Positive locking mechanism
- Sockets other than standard have color coded seals:
Water (Blue), Steam (Black), Silicon (White), and Heat (Red)

Safety: To connect, insert plug and pull sleeve forward. To disconnect, push sleeve back while rotating first counter clockwise and then clockwise. As sleeve goes back, supply line is shut off, downstream line is exhausted, and plug is released. Remove plug.

- 100% safety
- Connect and disconnect at "0" pressure
- Plug locked before air is turned on and downstream line is exhausted before plug is released, completely eliminating hose whip
- Tested to 1,000,000 operations with no leakage
- Special lubrication eliminates dry breakaway

Connection Sizes:

- 1/8" to 1" NPT
- 1/8" to 1" Hose Barb (Hose clamp required. See page 200 for Python hose clamps)
- 1/4" to 1/2" Push-on Hose Barb (Clamps not required when used with Push-On Hose. See page 369 for Push-On Hose)

Options:

Ball Lock (BL) – Locks manual socket against accidental disconnect. To connect, align ball with slot. After connection, rotate sleeve to lock. To disconnect, realign ball with slot and retract sleeve.

Sleeve Lock (SL) – Locks automatic socket against accidental disconnect. To connect, align notch with slot. After connection, rotate sleeve to lock. To disconnect, realign notch with slot and retract sleeve.

BALL CHECK PLUG – Eliminates hose-whip at disconnect by checking the rapid flow of downstream exhaust air.

SWIVEL PLUGS – Free swivel under pressure. Eliminates hose twist on end drop applications such as blow guns, air tools, etc.

Performance Data:

Foster Series	Body Size	Psig Rated Pressure, Coupled (Body / Sleeve)				Pressure Drop					
						Air Flow – CFM				Water Flow

* Contact factory for higher pressure applications.

One Way Shut-Off – Series 2 thru 6

(Industrial Interchange)

Features:

- High flow metal valves.
- Precision molded seals form a "bubble tight" seal for reliable operation within rated working pressures. Nitrile (Buna-N) seals are standard. EPDM, Viton and Neoprene seals are available as options.
- Proven ball locking mechanism with large numbers of stainless steel locking balls evenly distribute the load to resist wear and provide positive connections and allow a swiveling action to reduce hose torque.
- Integral sleeve guard protects the sleeve and resists accidental disconnects for the "SG" series.
- Knurling and/or grooves on the sleeve provide a gripping surface for ease of operation.
- Wide range of body sizes, materials, options and end terminations are available to meet specific needs.
- Accepts Industrial Interchange Plug.

Operation: Sleeve type couplings are widely used to connect air and low pressure fluid lines. Their compact and economical design uses a ball locking mechanism consisting of captive stainless steel balls that engage the locking groove on the mating plug. The sliding spring loaded sleeve on the socket must be manually retracted in order to connect or disconnect the plug.

Material: Brass body and socket end, zinc-plated steel sleeve

Working Pressure: 300 PSIG; vacuum to 27" Hg

Interchangeability: Complies with ANSI/NFPA T3.20.14-1990 & ISO 6150-B

Specifications	Body Size

		SJ8-2	.170" x 1/4"	Plastic
		BLSJ8-2		Ball Lock, 1/4" Plastic
		SJ8-2M	1/4"	Soft Metal
		BLSJ8-2M		Ball Lock, Soft Metal
		SJ8-2S/S		303 Stainless

Plastic & Metal Tubing Panel Mount		Part No.	Size	Description
		SJ8P-2	.170" x 1/4"	Plastic
		BLSJ8P-2		Ball Lock, Plastic
		SJ8P-2HW		Plastic for Hot Water
		SJ8P-2W		Plastic, for Water
		SJ8P-2M	1/4"	Soft Metal
		BLSJ8P-2M		Ball Lock, Soft Metal

2 Series 1/8" Plugs - Foster

Female Thread		Part No.	FPT	Description
		23-2	1/8"	Steel
		27-2	1/4"	

Male Thread		Part No.	MPT	Description
		22-2	1/8"	Steel
		22-2B	1/8"	Brass
		22-2S/S	1/8"	303 Stainless
		24-2	1/4"	Steel

Hose Stem		Part No.	I.D.	Description
		02-2	1/8"	Steel
		03-2	3/16"	
		04-2	1/4"	
	Requires Hose Clamp (See page 126 for typical hose clamps)			

Plastic and Metal Tubing		Part No.	Size	Description
		PJ8-2	0.170" x 1/4"	Plastic
		PJ8-2V	0.170" x 1/4"	Plastic - Valve Core Brass
		PJ8-2VLV	0.170" x 1/4"	Plastic - Less Valve
		PJ8-2M	1/4"	Soft Metal
		PJ8-2S/S	1/4"	Stainless Steel
		PJ8-2VM	1/4"	Soft Metal - Valve Core Brass

1-Way Shut-Off – 3 thru 6 & B, C, D Series

(Industrial Interchange)

Foster 3 thru 6 Series couplers are designed for rigid mounting that allows a simple push-to-connect operation, constructed of a solid brass body and a steel valve. The "FM" Series are mechanically interchangeable with similar industrial interchange couplings made by other manufacturers and accept plugs that conform to MIL-C4109-F. Plugs used with the "FM" Series are the Industrial Interchange plugs that are found on pages 21, 26, 32, and 34 of this catalog. FM Series 3 and 5 couplers comply with A-A-59439.

Sleeve-Lock Option:

Sleeve-Lock feature locks automatic socket against accidental disconnect. To connect, align ball with slot. After connection, rotate sleeve to lock. To disconnect, realign ball with slot and retract sleeve. Sizes available with sleeve lock are shown in the tables on following pages.

Specifications	Body Size			
	1/4"	3/8"	1/2"	3/4"
Rated Pressure (psig)	300 PSIG; vacuum to 27" Hg			
Temperature Range (std seals)	-40° to +250° F			
Locking Device	3 pins	4 pins	6 pins	6 pins
Vacuum Data				
-- Disconnected (coupler only)	Not Recommended			
-- Connected	27" Hg			
Approximate CFM at 100 (psig)	37	70	150	190

Optional Seal [Ordering]:

Buna-N seal is standard. Alternate seals are specified by adding the appropriate suffix to the catalog number. For example, 3003 socket with Heat Adder is 3003H

Service	Construction	Seal	Temperature	Suffix
Air, Vacuum, Grease, & Oil	Brass & Steel	Buna-N	-40° to +250°F	none
Water	Brass & S/S	Buna-N	+32° to +100°F	W
Hot Water	Brass & S/S	Viton	-15° to +400°F	HW
Steam	Brass Body, Brass Sleeve, & Stainless Steel Valve	Ethylene Propylene	-40° to +300°F	S
Heat	Brass & Steel	Viton	-15° to +400°F	H
Less Valve	Brass & Steel	Buna-N	-40° to +250°F	LV
Dill Valve Series 3 Only	Brass & Steel	Buna-N	-40° to +250°F	D

Performance:

3 & C Series 1/4" 1-Way Manual Sleeve Guard Sockets

Female Thread		Part No.	Brand	FPT	Description
		SG2803	F	1/8"	Brass
		SG3003	F	1/4"	
		B-2CF2-B	B	1/4"	
		SG3003LV	F	1/4"	Brass, less Valve
		B-2CF2-SS	B	1/4"	Stainless Steel
		SG3203	F	3/8"	Brass
		B-2CF3-B	B	3/8"	

Hose Stem		Part No.	Brand	I.D.	Description
		SG3603	F	1/4"	Brass
		B-2CS2-B	B	1/4"	
		B-2CS25-B	B	5/16"	
		SG3703	F	3/8"	
		B-2CS3-B	B	3/8"	

Requires Hose Clamp (See page 126 for typical hose clamps)

Male Thread		Part No.	Brand	MPT	Description
		SG2903	F	1/8"	Brass
		SG3103	F	1/4"	
		B-2CM2-B	B	1/4"	
		SG3103D	F	1/4"	Brass w/Dill Valve
		B-2CM2-SS	B	1/4"	Stainless Steel
		SG3303	F	3/8"	Brass
		B-2CM3-B	B	3/8"	

Sockets with modified valves are recommended for use with valve core plugs. Suffix-D to socket Cat. No.

Push-On Hose Stem		Part No.	Brand	I.D.	Description
		SG1513	F	1/4"	Brass
		B-2CPS2-B	B	1/4"	
		SG1713	F	3/8"	
		B-2CPS3-B	B	3/8"	

Hose clamps not required when used with "Push On" hose. See page 115.

Reusable Hose Fittings		Part No.	Brand	I.D.	Description
		B-2CE2-B	B	1/2"	Brass w/Brass Sleeve
		B-2CG2-B		9/16"	
		B-2CH2-B		5/8"	

Sockets with modified valves require a plug with a dill valve.

Sockets with modified valves (Dill Valve)

1/4" One Way Shut-Off – 3 & D Series

(Industrial Interchange)

3 & D Series 1/4" 1-Way Manual Sockets

1/4" One Way Shut-Off – 3 Series

(Industrial Interchange)

3 Series 1/4" Plugs

Female Thread		Part No.	Brand	FPT	Description
		13-3	F	1/8"	Steel
		B-B2F1-S	B		
		13-3B	F		
		13-3S/S	F	1/4"	Brass 303 Stainless
		11-3	F		
		B-B2F2-S	B		
		11-3B	F	3/8"	Steel
		B-B2F2-B	B		
		11-3S/S	F		
		B-B2F2-SS	B	3/8"	Brass 303 Stainless
		15-3	F		
		B-B2F3-S	B		

Male Thread		Part No.	Brand	MPT	Description
		12-3	F	1/8"	Steel
		B-B2M1-S	B		
		12-3B	F		
		12-3S/S	F	1/4"	Brass 303 Stainless
		10-3	F		
		B-B2M2-S	B		
		10-3B	F	3/8"	Steel
		B-B2M2-B	B		
		10-3S/S	F		
		B-B2M2-SS	B	3/8"	Brass 303 Stainless
		10-3D	F		
		10-3G	F		
		10-3GB	F	3/8"	w/Dill Valve Steel Ball Check, Steel
		10-3GS	F		
		10-3GS/S	F		
		10-3DB	F	3/8"	Ball Check, Spring Loaded Steel Ball Check, 303 Stainless Brass, Valve Core Plug
		14-3	F		
		B-B2M3-S	B		
		14-3B	F	3/8"	Steel
		14-3GB	F		

Male Thread Free Swivel - Under Pressure		Part No.	MPT	Description
		12S-3	1/8"	Brass / Steel
		10S-3	1/4"	
		14S-3	3/8"	

Swivel Plugs – Eliminates hose twist on end drop applications such as blow guns, air tools, etc.

Ball check plugs eliminate hose whip at disconnect by checking the rapid flow of downstream exhaust air
Swivel Plugs – Eliminates hose twist on end drop applications like blow guns, air tools, etc.

See page 156 for full size templates

3/8" One Way Shut-Off – 4 & D Series

(Industrial Interchange)

4 & D Series 3/8" 1-Way Manual Sockets (Continued)

Female Thread		Part No.	Brand	FPT	Description
		4004	F	1/4"	Brass/Steel
		D440	B		
		BL4004	F		Ball Lock, Brass/Steel
		D440BL	B		
		4204	F	3/8"	Brass/Steel
		D460	B		
		BL4204	F		Ball Lock, Brass/Steel
		D460BL	B		
		4204H	F		For Heat, Viton Seal, Brass/Steel
		4204S			For Steam, Brass/SS, EPDM Seal
	4204S/S	303 Stainless			
	BL4204S/S	Ball Lock, 303 Stainless			
	4204W	For Water, Brass/SS, Buna-N Seal			
	4404	F	1/2"	Brass/Steel	
	D480	B			
	BL4404	F		Ball Lock, Brass/Steel	
	D480BL	B			

Male Thread		Part No.	Brand	MPT	Description	
		4104	F	1/4"	Brass/Steel	
		D441	B		Ball Lock, Brass/Steel	
		BL4104	F			
		D441BL	B			
		4104H	F			For Heat, Viton Seal, Brass/Steel
		4104S				For Steam, Brass/SS, EPDM Seal
		4104W				For Water, Brass/SS, Buna-N Seal
		4304	F	3/8"		Brass/Steel
		D461	B		Ball Lock, Brass/Steel	
		BL4304	F			
		D461BL	B			
		4304S	F			For Steam, Brass/SS, EPDM Seal
		4304S/S				303 Stainless
		BL4304S/S				Ball Lock, 303 Stainless
		4304W				For Water, Brass/SS, Buna-N Seal
		4504	F	1/2"		Brass/Steel
		D481	B		Ball Lock, Brass/Steel	
		BL4504	F			
		D481BL	B			
		4504H	F			For Heat, Viton Seal, Brass/Steel
		4504S				For Steam, Brass/SS, EPDM Seal
		4504W				For Water, Brass/SS, Buna-N Seal

Hose Stem	Part No.	Brand	I.D.	Description
	4604	F	1/4"	Brass/Steel
	D442	B		
	BL4604	F		Ball Lock, Brass/Steel
	D442BL	B		
	4604W	F	5/16"	For Water, Brass/SS, Buna-N Seal
	4704	F		Brass/Steel
	D452	B		
	BL4704	F		Ball Lock, Brass/Steel
	D452BL	B	3/8"	
	4804	F		Brass/Steel
	D462	B		
	BL4804	F		Ball Lock, Brass/Steel
	D462BL	B		
	4804S/S	F	1/2"	303 Stainless
	4804S			For Steam, Brass/SS, EPDM Seal
	4804W			For Water, Brass/SS, Buna-N Seal
	4904	F		Brass/Steel
	D482	B	3/4"	
	BL4904	F		Ball Lock, Brass/Steel
	D482BL	B		
	4904S	F		For Steam, Brass/SS, EPDM Seal

Requires Hose Clamp (See page 126 for typical hose clamps)

Products for steam are brass body, brass sleeve and stainless steel valve.

Brand - Designates **F**=Foster or **B**=Breco Part
Foster Engineering Catalog

See page 156 for full size templates

4 Series 3/8" Plugs

Female Thread		Part No.	Brand	FPT	Description
		41-4	F	1/4"	Steel
		B-B3F2-S	B		
		43-4	F	3/8"	Steel
		B-B3F3-S	B		Brass
		B-B3F3-B	B		
		43-4S/S	F		303 Stainless
		45-4	F	1/2"	Steel
		B-B3F4-S	B		

Male Thread		Part No.	Brand	MPT	Description
		38-4	F	1/8"	Steel
		40-4	F	1/4"	Steel
		B-B3M2-S	B		Brass
		40-4B	F		
		40-4S/S	F		303 Stainless
		42-4	F	3/8"	Steel
		B-B3M3-S	B		Brass
		42-4B	F		
		B-B3M3-B	B		303 Stainless
		42-4S/S	F		
		44-4	F	1/2"	Steel
		B-B3M4-S	B		

Male Thread Free Swivel - Under Pressure		Part No.	MPT	Description
		40S-4	1/4"	Brass /Steel
		42S-4	3/8"	
		44S-4	1/2"	
	Swivel Plugs – Eliminates hose twist on end drop applications such as blow guns, air tools, etc.			

Hose Stem		Part No.	Brand	I.D.	Description
		46-4	F	¼"	Steel
		B-B3S2-S	B		
		47-4	F	5/16"	Steel
		48-4	F	¾"	Steel
		B-B3S3-S	B		Brass
		48-4B	F		
		48-4S/S	F		303 Stainless
		49-4	F	½"	Steel
		B-B3S4-S	B		
Requires Hose Clamps (See page 126 for typical hose clamps)					

Push-On Hose Stem		Part No.	Brand	I.D.	Description
		51-4	F	1/4"	Steel
		B-B3PS2-S	B		
		71-4	F	3/8"	Steel
		B-B3PS3-S	B		Brass
		71-4B	F		
		81-4	F	1/2"	Steel
Hose clamps not required when used with "Push On" hose. See page 115.					

Reusable Hose Clamp		Part No.	I.D. x O.D.	Description
		PB3-4	1/4" x 1/2"	Steel
		PB5-4	1/4" x 3/16"	Steel
		PB7-4	1/4" x 5/8"	Steel
		PD7-4	3/8" x 5/8"	Steel
		PD9-4	3/8" x 1 1/16"	Steel
		PD11-4	3/8" x 3/4"	Steel
		PD13-4	3/8" x 13/16"	Steel

1/2" One Way Shut-Off – 5 & C Series

(Industrial Interchange)

5 & C Series 1/2" 1-Way Manual Sleeve Guard Sockets - Breco

Female Thread		Part No.	FPT	Description
		B-4CF3-S	3/8"	Steel
		B-4CF4-B	1/2"	Brass w/Brass Sleeve
		B-4CF4-S		Steel
		B-4CF6-S	3/4"	Steel

Male Thread		Part No.	FPT	Description
		B-4CM3-S	3/8"	Steel
		B-4CM4-B	1/2"	Brass w/Brass Sleeve
		B-4CM4-S		Steel
		B-4CM6-S	3/4"	Steel

Hose Stem		Part No.	FPT	Description
		B-4CS3-S	3/8"	Steel
		B-4CS4-S	1/2"	Steel
		B-4CS6-S	3/4"	Steel
	Requires Hose Clamp (See page 126 for typical hose clamps)			

Push-On Hose Stem		Part No.	I.D.	Description
		B-4CPS3-S	3/8"	Steel
		B-4CPS4-S	1/2"	Steel
Hose clamps not required when used with "Push On" hose. See page 115.				

5 & D Series 1/2" 1-Way Shut-Off Sockets

Female Thread		Part No.	Brand	FPT	Description	
		4015	F	1/4"	Brass/Steel	
		D540	B		Ball Lock, Brass/Steel	
		BL4015	F			
		D540BL	B			
		5005	F	3/8"		Brass/Steel
		D560	B		Ball Lock, Brass/Steel	
		BL5005	F			
		D560BL	B			
		5005H	F			For Heat, Viton Seal
		5005W			For Water, Brass/SS, Buna-N Seal	
		5205	F		1/2"	Brass/Steel
		D580	B			Ball Lock, Brass/Steel
		BL5205	F			
		D580BL	B			
		5205H	F	For Heat, Viton Seal		
		5205LV		Less Valve		
		5205S/S		303 Stainless		
		5205W		For Water, Brass/SS, Buna-N Seal		
		5405	F	3/4"		Brass/Steel
		D5120	B			Ball Lock, Brass/Steel
		BL5405	F			
		D5120BL	B			
		5405W	F		For Water, Brass/SS, Buna-N Seal	

Male Thread

Part No.	Brand	MPT	Description
4905	F	1/4"	Brass/Steel
D541	B		
BL4905	F		Ball Lock, Brass/Steel
D541BL	B		
5105	F	3/8"	Brass/Steel
D561	B		
BL5105	F		Ball Lock, Brass/Steel

		52S-5	3/8"	Brass /Steel
		54S-5	1/2"	
Swivel Plugs – Eliminates hose twist on end drop applications such as blow guns, air tools, etc.				

Hose Stem		Part No.	Brand	I.D.	Description
		59-5	F	3/8"	Steel
		B-B4S3-S	B		Steel
		59-5B	F	3/8"	Brass
		60-5	F	1/2"	Steel
		B-B4S4-S	B		Steel
		60-5G	F	1/2"	Ball Check, Steel
		60-5B	F	1/2"	Brass
		61-5	F	3/4"	Steel
		B-B4S6-S	B		Steel
		61-5B	F	3/4"	Brass
		Requires Hose Clamps (See page 126 for typical hose clamps)			

Push-On Hose Stem		Part No.	Brand	I.D.	Description
		71-5	F	3/8"	Steel
		B-B4PS3-S	B		
		81-5	F	1/2"	Steel
		B-B4PS4-S	B		
		81-5B	F	1/2"	Brass
		Hose clamps not required when used with "Push On" hose. See page 115.			

Reusable Hose Clamp		Part No.	I.D. x O.D.	Description
		PB3-5	1/4" x 1/2"	Steel
		PB5-5	1/4" x 9/16"	
		PB7-5	1/4" x 5/8"	
		PD7-5	3/8" x 5/8"	Steel
		PD9-5	3/8" x 11/16"	
		PD11-5	3/8" x 3/4"	
		PD13-5	3/8" x 13/16"	Steel
		PP13-5	1/2" x 13/16"	
		PP15-5	1/2" x 7/8"	
		PP17-5	1/2" x 15/16"	
		PP19-5	1/2" x 1"	Steel

Ball check plugs eliminate hose whip at disconnect by checking the rapid flow of downstream exhaust air

3/4" One Way Shut-Off – 6 & B Series

(Industrial Interchange)

6 & B Series 3/4" 1-Way Automatic Sockets

Female Thread		Part No.	Brand	FPT	Description
		FM6206	F	1/2"	Brass
		B-6BF4-B	B		
		SL6206	F		Sleeve Lock, Brass
		B-6BF4-B-SL	B		
		FM6206W	F	3/4"	For Water, Brass/SS, Buna-N Seal

		B-B6S8-S	B		

Requires Hose Clamps (See page 126 for typical hose clamps)

Male Thread Swivel Under Pressure		Part No.	MPT	Description
		66S-6	3/4"	Brass /Steel

Swivel Plugs – Eliminates hose twist on end drop applications such as blow guns, air tools, etc.

1/4" - 210 & O Series

(Interchange with ARO 210 Series)

Foster 210 Series couplings are available manual or automatic to connect designs and interchange with 1/4" body size ARO 210 series plugs.

Specifications:

Type: One-Way Shut-Off

Rated Pressure: 300 psig

Temperature Range (Buna seal): -40° to +250°F.

Locking Device: Stainless Steel pins

Operation:

Manual - Socket sleeve must be retracted to connect and disconnect

Automatic - Push to Connect, retract socket sleeve to disconnect

Performance:

1/4" - TF & J Series

(Interchange with Tru-Flate Series)

TF Series Couplers (pneumatic) up to 300 psig connect with Tru-Flate design, commonly called the automotive interchange. They have manual sleeves and are single shut off quick couplings. The steel tubular valve delivers high air flow with minimal pressure drop. Couplers and Nipples are available in a wide range of sizes and materials for use in a variety of applications with air or fluid.

Type: One Way Shut-Off

Rated Pressure: 300 PSIG

Operation:

Automatic - Push to Connect, retract socket sleeve to disconnect

Sizes: 1/4", 3/8", (For 1/2" use Industrial Interchange product)

Features:

- Developed for the automotive industry
- High flow valves with minimal pressure drop
- Integral Sleeve guard helps prevent accidental disconnect
- Grip-ring sleeve version has a larger knurled diameter to provide easy operation when gloves are worn

Applications:

- Air compressors, Pneumatic Tools
- Grease guns, Paint applicators

		B-4CM3-S	3/8"	Steel
		B-4CM4-B	1/2"	Brass
		B-4CM4-S		Steel
		B-4CM6-S	3/4"	Steel

Hose Stem		Part No.	I.D.	Description
		B-4CS3-S	3/8"	Steel
		B-4CS4-S	1/2"	Steel
		B-4CS6-S	3/4"	Steel
		Requires Hose Clamps (See page 126 for typical hose clamps)		

Push-On Hose Stem		Part No.	I.D.	Description
		B-4CPS3-S	3/8"	Steel
		B-4CPS4-S	1/2"	Steel
Hose clamps not required when used with "Push On" hose. See page 115.				

J Series 1/2" Plugs - Breco

Female Thread		Part No.	FPT	Description
		B-B4F3-S	3/8"	Steel
		B-B4F4-S	1/2"	Steel
		B-B4F6-S	3/4"	Steel

Male Thread		Part No.	MPT	Description
		B-B4M3-S	3/8"	Steel
		B-B4M4-S	1/2"	Steel
		B-B4M6-S	3/4"	Steel

Hose Stem		Part No.	I.D.	Description
		B-B4S3-S	3/8"	Steel
		B-B4S4-S	1/2"	Steel
		B-B4S6-S	3/4"	Steel
	Requires Hose Clamps (See page 126 for typical hose clamps)			

Push-On Hose Stem		Part No.	I.D.	Description
		B-B4PS3-S	3/8"	Steel
		B-B4PS4-S	1/2"	Steel
		Hose clamps not required when used with "Push On" hose. See page 115.		

SHD & TL Series

(Interchange with Schrader Standard & Heavy Duty)

Features:

- Engineered for speedy coupling and uncoupling.
To lock - push in; To unlock - rotate sleeve 1/8 turn.
- Designed to protect against accidental uncoupling. A variety of types and sizes are available to meet specific needs.
- Standard Twist-Lock couplings are ideal for low to medium air flows, such as air tools.

Specifications:

Temperature Range (Nitrile seal): -40° to +250°F

Locking Device: Twist-Lock

Vacuum Service: 27" HG

Type: One Way Shut-Off

Rated Pressure: 300 PSIG

Operation: Automatic Push to Connect; Twist-to-release

Materials: Aluminum bodies and zinc plated steel sleeves.
Buna-N seals. Brass adapters.

Performance:

SHD & TL Series Automatic 1/4" Sockets

		SHD54	F		1/2"	
		B-TL4M6-S	B		3/4"	

Hose Stem		Part No.	Brand	Size	I.D.	Description
		SHD59	F	1/2"	3/8"	Steel
		SHD60			1/2"	

Requires Hose Clamp (See page 126 for typical hose clamps)

Type: One Way Shut-Off

Rated Pressure: 300 PSIG

Safety: Sleeve must be retracted to connect and disconnect

Applications & Markets:

- Designed for use with compressed air and other gases
- General Pneumatics • Breathing Equipment • Welding
- Shipyards • Construction

■ Series O60 couplings used with oxygen at 100 psig or less

■ Series A70 couplings used with acetylene at 15 psig or less

COLOR CODED SOCKETS

■ **O60 – GREEN SLEEVE BAND • OXYGEN SERVICE**

■ **A70 – RED SLEEVE BAND • ACETYLENE SERVICE**

*When used for oxygen/acetylene service,
order with Ball Lock (BL) to comply with
OSHA Std. 1915.55(f)(5).*

Brand - Designates **F**=Foster or **B**=Breco Part

1/4" - A70 Series

(Interchange with Hansen 700 Series)

Features:

- Safety sleeve lock prevents accidental disconnections
- Non-Interchangeable design prevents crossing of lines
- Color coded sleeves for easy identification:
O60 - green, A70 - red
- OSHA compliant
- Construction: Brass w/Buna-N seal

Brand - Designates **F**=Foster or **B**=Breco Part

Type: One Way Shut-Off

Rated Pressure: 300 PSIG

Operation: Automatic Push to Connect; Twist-to-release

Features:

- High flow capacity
 - Ring lock
- Push to Connect, retract socket sleeve to disconnect
- Will not disconnect when hose is dragged on the ground
- Rotate locking sleeve approximately 20° to disconnect
- Optional seal materials available

Standard Materials:

- Socket
 - Zinc Plated Steel Body
 - Brass Socket End
 - Zinc Plated Steel Sleeve
 - Zinc Plated Steel Valve
 - Buna-N (Nitrile) Seal
 - Spring is Zinc Plated Music Wire
 - Zinc Plated Steel Locking Ring
- Plug
 - Zinc Plated Case-Hardened Steel

Requires Hose Clamp (See page 126 for typical hose clamps)					

Foster LN Series couplings are interchangeable with Lincoln's "Long Nose" series couplings and offer quick coupling of all air-operated equipment. They are only available in 1/4" body size, brass and steel construction.

- Locking feature prevents accidental coupler detachment
- Increased air flow due to a larger air passage
- Automatic air check valve shuts off air instantly when uncoupled, providing leak-proof seal.
- Corrosion resistant steel for long service life
- Free swivel helps prevent kinking or curling of air hoses

Specifications:

Type: One Way Shut-Off

Rated Pressure: 300 PSIG

Temperature Range (std seals): -40° to +250°F.

Locking Device: Balls or pins

Operation:

Manual - socket sleeve must be retracted to connect and disconnect

Automatic - Push to Connect, retract socket sleeve to disconnect

Performance:

		Requires Hose Clamp (See page 126 for typical hose clamps)		

(Interchange with Hansen 180 Series)

The F180 miniature ball-lock quick disconnect coupling/plug offers great performance in a very small size with high flow and minimal pressure drop. Designed for use with compressed air, gases, and liquids. It's perfect for breathable air, lab, medical, and pharmaceutical applications. It's a preferred choice anywhere high flow is required within a very tight space, such as boat lifts.

Performance:

- **Temperature Range (std Buna-N seals):** -40° to +225° F.
- **Max. Operating Pressure:** 700 psig (48 bar)
- **Min. Burst Pressure:** 2,800 psig (193 bar)
- **Flow Rate:** 2.5 scfm (71 lpm)

Features:

- Miniature Ball-Lock Quick Disconnect Coupling
- Designed for use with Compressed Air, Gasses, and Liquids
- Hansen 180 Series Interchange
- Standard Brass Body, Optional Plating Available
- F180 Series Utilizes a Tire Valve
- Can Be Used in Laboratory, Medical, Pharmaceutical, Food, and Beverage
- Offered with 1/8" Male NPT or 3/16" I.D. Hose Barb
- Standard Buna-N, Flexible Seal

F180 Sockets - 1/8" - Foster

Male Thread		Part No.	Thread	Body Size	Description
		F180	1/8" Male NPT	1/8"	Brass, with Valve

Hose Barb		Part No.	Thread	Body Size	Description
		F184LV	3/16" I.D. Hose Barb	1/8"	Brass, without Valve
	Requires Hose Clamp (See page 126 for typical hose clamps)				

F180 Plugs - 1/8" - Foster

Male Thread		Part No.	Thread	Body Size	Description
		F185	1/8" Male NPT	1/8"	Brass

Hose Barb		Part No.	Thread	Body Size	Description
		F189	3/16" I.D. Hose Barb	1/8"	Brass
		Requires Hose Clamp (See page 126 for typical hose clamps)			

1/8" - DR Series

(Interchange with Rectus 21 KA)

BRECO DR Series couplers are designed to interchange with Rectus 21 KA couplers using un-valved plugs. The DR Series products provide automatic push-to-connect ease and high flow in a 1/8" connection size.

Features:

- Maximized flow path allows greater flow than other 1/8" NPT coupler designs
- 6 retaining balls versus 5 in the Rectus 21 KA provides greater plug retention
- 9/16" Wrench flats versus 14mm on Rectus 21 KA
- Ball-holes with corner radius have 65% more ball-to-body contact area and provides longer life and increased reliability
- Precision molded leak-proof seal
- Quick, easy push-to-connect design
- Brass construction for corrosion resistance

Specifications

Material: Brass plugs & sockets

Seal: Buna-N

Air Flow: 17 CFM @ 100 PSIG @ 5.0 PSIG Pressure Drop

Working Pressure: 300 PSIG

Body Sizes: 1/8"

Connection Sizes: 1/8" NPT

Interchangeability: Rectus 21 KA, Tomco SC, Camozzi 5000, and CEJN 223 Series

DR Series Sockets - Breco

BRECO PNEUMATIC UNIVERSAL COUPLER ACCEPTS MULTIPLE SERIES NIPPLES

Features:

- The 1/4" Universal Coupler will accept the Industrial Interchange series, "J" series (Tru-Flate) & "O" Series (ARO-210) Plugs.
- The coupler features automatic push-to-connect operation, high flow machined "window valve" and a sleeve guard which helps prevent accidental disconnects and protects the sleeve from damage.
- While the best quick coupling performance is obtained by matching like series sockets and plugs, the universal coupler permits multiple series plugs to mate with one socket.

"J" Series
(see pages 294-296)

"O" Series
ARO-210
(see page 290)

"B" Series
(see pages 275, 280)

Specifications:

Rated Pressure (psig): 150

Temperature Range (Nitrile seal): -40° to +250°F.

Locking Device: Stainless Steel balls

Vacuum Service: Not Recommended

Foster SV and SVPC Series Safety Vent couplings are designed for maximum user and equipment safety. Foster SV and SVPC Series couplings allow for safe and easy connection/disconnection under zero line pressure to minimize the possibility of inadvertent disconnection and potential hose whip.

The fully encapsulated non-marring models significantly reduce the risk of surface nicks and scratches. Ideal for use in paint booth applications or for air lines used around finished surfaces, such as fiberglass, painted metal or glass surfaces.

Features:

- Made in the USA
- Rubber or polyurethane hose connections available
- Extra thick heat-treated steel walls extend service life
- Zero pressure connect/disconnect design vents down stream pressure for safe, easy connect/disconnect. It also minimizes possible inadvertent disconnection and potentially dangerous hose whip
- "O-ring" plug seal for leak-free performance
- No valve, spring, or washer that could block flow of air.
- Silicone-free assembly.
- Meets ISO 4414, 9.6 Quick-Action Couplings requirements: Quick-Action (quick release) couplings shall be selected so that when they are coupled or uncoupled
 - a) the coupling shall not be forced apart in a hazardous manner
 - b) compressed air particles shall not be expelled in a hazardous manner
 - c) a controlled pressure-release system shall be provided where a hazard may exist.

Specifications:

Material: Zinc-plated steel, Acetal Copolymer outside cover, Steel internals

Seal: Buna-N

Working Pressure: 300 PSIG; vacuum to 26"Hg

Body Sizes: 1/4" to 3/4" Industrial Interchange Design

Connection Sizes: 1/4" to 1" NPT; 1/4" to 3/4" Hose Barb

Interchangeability: Complies with ANSI/NFPA T3.20.14-1990, ISO 6150-B, & ISO 4414

Industrial Interchange profile, Series 3 – 6, pages 275, 280, 286, & 288

Rated Pressure: 300 psig

Temperature Range (std seals): 0° to +150° F

Locking Device: Stainless Steel Balls

Force required to Connect: Less than 10 lbs

Performance:

**"SV", "SVPC" Series (1/4", 3/8", 1/2", 3/4")
Pressure Drop/Flow Performance Curves
@ 100 PSIG Inlet**

PC = Protective Cover

Safety Vent Series

Zero Pressure Connect and Disconnect Design

Operation: SV and SVPC Series Safety Vent couplers are nearly effortless to connect and great for hose use. They are also especially useful for single-hand operation when they are mounted to hard lines such as an overhead air drop.

Once inserted into the SV or SVPC socket, the plug is lightly gripped and will stay in place allowing the operator to use the same hand to slide the sleeve straight forward to the "on" position.

SV or SVPC Series sockets can also be used as a 3-way valve to turn off the flow of air and exhaust the downstream pressure without disengaging the plug. By turning and sliding the sleeve to the "exhaust" position, downstream air pressure is relieved but the plug remains locked in place.

Foster SV or SVPC Series couplers are the ultimate solution to accidental disconnect hose whip dangers.

Push-Button Safety Vent Series

Zero Pressure Connect and Disconnect Design

Features:

- Industrial Interchange, Pneumatic Application
- Anodized Aluminum Body for long life
- Swivel body to keep hose untangled
- Push twice for release. First push vents, second releases
- Button, Valve & Venting Ring: Hardened zinc plated steel
- **Springs, Balls:** Stainless Steel
- ISO 4414 Norm
- **Flow capacity:** 37SCFM (at 90 psig with connected insert)
- **Max working pressure:** 175 psig (safety factor 4:1)
- **Recommended Working Temperature:** 0° to 160°F

FJT Series

(Interchange DME, Jiffy-Tite, Jiffy-Matic, Parker Moldmate)

Specifications & Layouts FJT Series

Foster FJT Series couplers are designed to connect coolant lines to plastic molds and die casting dies. FJT Series plugs are mounted in the mold. They can be threaded directly into the mold coolant ports or recessed into the mold for a flush surface during storage. Sockets have hose stems, either standard hose or "Push-on" type, for direct connection to the coolant line going to the manifold. Seal compound is silicone for use with water, ethylene glycol, or air.

Type: Straight-Thru, One Way or Two Way

Interchangeability: DME Jiffy-Tite and Jiffy-Matic and Parker Moldmate couplers

Operation: Manual – Socket sleeve must be manually retracted to connect and disconnect

Options:

Ball Lock (BL) - Locks manual socket against accidental disconnect. To connect, align ball with slot.

After connection, rotate sleeve to lock.

To disconnect, realign ball with slot and retract sleeve.

Features:

- Precision leakproof seal is silicone
- Two piece construction on straight stem sockets
- Double knurl on socket sleeve for easier grip
- Sockets have six balls.

Specifications:

Temperature Range: -90° to +440° F

Rated Pressure: 200 PSIG

Cat. No.	NPT	A	B	C
FP251 (F)	1/8	0.687	0.687	1.000
FP252 (F)	1/4	0.843	0.937	1.278

FP556 (F)				

(F) – Suffix F for female pipe thread

Performance Data		Flow
		Water – GPM 10 PSIG Pressure Drop
FJT 1/4"	Straight-Thru	4.5
FJT 1/4" V	One Way (valved)	2.3
FJT 3/8"	Straight-Thru	10.0
FJT 3/8" HF	High Flow	13.8
FJT 3/8" V	One Way (valved)	5.9
FJT 1/2"	Straight-Thru	28.2

Performance:

Features:

1. Available with or without valves in the coupler. Non-valved couplers have minimum flow resistance for maximum cooling. Valved couplers shut off automatically upon disconnect. Valved couplers must be used with valved nipples.
2. Nipples are designed to be recessed below mold surfaces to provide more efficient storage of molds and prevent damage to the nipple.
3. Widest choice of end fittings available, including straight, 45° or 90° with standard hose barb or Push-Lock barbs for easy installation.
4. Couplers and nipples are made of corrosion resistant steel and brass.

Applications: Injection Mold Series couplings are specifically designed for connecting coolant lines to molds and dies, on injection molding machinery in the plastics and die casting industries. Injection Mold Series couplings significantly reduce machine downtime by providing fast and easy connection of coolant lines during mold changes. Their short nipples can be recessed below the surface of the mold for more efficient storage of molds. Injection Mold Series couplers are available with or without valves in the female half. Non-valved couplers provide maximum flow for efficient cooling. Valved couplers shut off when disconnected.

Selection Guidelines: Injection Mold Series couplings are designed for a maximum working pressure of 200 Psig. Most thermoplastic and thermostat heat transfer systems have pumps which provide relatively high flow rates at relatively low pressures. Water and water glycol (anti-freeze) systems usually have capacities ranging from 10 to 40 gpm, with most from 10 to 15 gpm. Normal medial opening pressures are 20 to 60 Psig for these systems. Heat transfer systems using oil generally operate from 10 to 30 Psig. However, their flow rates are usually much higher, requiring the total volume of oil to be circulated at least once per minute.

The number of hose connections in a single mold system results in a cumulative pressure drop. Please note the Pressure Drop vs. Flow Rate chart provided, to select the appropriate size.

Temperature is another important consideration. Injection Mold Series couplings with their standard Silicone seal have a temperature capability of -90° to +440°F. Rapid deterioration of the seal and leaking may result if used beyond these limits.

External conditions of temperature, corrosive atmospheres, and other abnormalities may affect coupling performance and must be considered when selection is made consult factory with questions.

FJT Series Brass Extension Plugs

- One piece construction for fast assembly, positive removal
- Installation problems associated with pipe nipple extensions on standard plugs are eliminated
- One-piece brass construction eliminates a potential leak point and ensures removability
- A variety of pipe sizes and lengths are available per the enclosed table
- Lengths available: 2.5" thru 13" Standard, Call factory for available lengths
- To Order: Add desired length to the end of the part number; i.e. FP251x2.5.

FJT 1/4" Series One Way Valved Sockets - Foster

Straight Hose Stem		Part No.	I.D.	Description
		FS204V	1/4"	Brass
		BLFS204V		Ball Lock, Brass, Valved
		FS205V	5/16"	Brass
		BLFS205V		Ball Lock, Brass, Valved
		FS206V	3/8"	Brass
		BLFS206V		Ball Lock, Brass, Valved

Requires Hose Clamp (See page 126 for typical hose clamps)

Straight Push-On Hose Stem		Part No.	I.D.	Description
		FS204VP	1/4"	Brass
		BLFS204VP		Ball Lock, Brass, Valved
		FS206VP	3/8"	Brass

Hose clamps not required when used with "Push On" hose. See page 115.

90° Hose Stem		Part No.	I.D.	Description
		FS214V	1/4"	Brass
		BLFS214V		Ball Lock, Brass
		FS215V	5/16"	Brass
		BLFS215V		Ball Lock, Brass
		FS216V	3/8"	Brass
		BLFS216V		Ball Lock, Brass

Requires Hose Clamp (See page 126 for typical hose clamps)

90° Push-On Hose Stem		Part No.	I.D.	Description
		FS214VP	1/4"	Brass
		BLFS214VP		Ball Lock, Brass
		FS216VP	3/8"	Brass
		BLFS216VP		Ball Lock, Brass

Hose clamps not required when used with "Push On" hose. See page 115.

45° Hose Stem		Part No.	I.D.	Description
		FS224V	1/4"	Brass
		BLFS224V		Ball Lock, Brass
		FS225V	5/16"	Brass
		BLFS225V		Ball Lock, Brass
		FS226V	3/8"	Brass
		BLFS226V		Ball Lock, Brass

Requires Hose Clamp (See page 126 for typical hose clamps)

45° Push-On Hose Stem		Part No.	I.D.	Description
		FS224VP	1/4"	Brass
		BLFS224VP		Ball Lock, Brass, Valved
		FS226VP	3/8"	Brass
		BLFS226VP		Ball Lock, Brass, Valved

Hose clamps not required when used with "Push On" hose. See page 115.

Socket w/o Stem		Part No.	FPT	Description
		FS200V	1/8"	Brass Valved
		BLFS200V		Ball Lock, Brass

3/8" - FJT Series

(Interchange DME, Jiffy-Tite, Jiffy-Matic, Parker Moldmate)

FJT 3/8" Series Straight Thru Sockets - Foster

Straight Hose Stem		Part No.	I.D.	Description
		FS306	3/8"	Brass
		BLFS306		Ball Lock, Brass
		FS308	1/2"	Brass
		BLFS308		Ball Lock, Brass
		Requires Hose Clamp (See page 126 for typical hose clamps)		

90° Hose Stem		Part No.	I.D.	Description
		FS316	3/8"	Brass
		BLFS316		Ball Lock, Brass
		FS318	1/2"	Brass

CAUTION: It is important that users of the Quick Release Couplers read the safety guidelines on pages 8 - 9. Improper use of products can lead to severe injury and damage to equipment.

- 1** ISO B in steel has hardened plugs and sleeves constructed from solid bar stock ensures long service life and maximum resistance to damage from hydraulic and mechanical shock.
- 2** High flow capacity.
- 3** Foster's conical valve with its 360° metal to metal valve stop maintains valve alignment and ensures that poppets open fully every time.
- 4** Captive valve seal ensures "bubble tight" poppet sealing since seal is positively captured by the metal poppet to minimize seal washout or damage from high fluid velocity.
- 5** Ball locking mechanism ensures reliable connections every time. Many ball bearings distribute the load while providing alignment and excellent swiveling action to reduce hose torque and prolong hose life.
- 6** Broad range of metals and seal materials allow the use of most fluids.

1/8" to 1" - FHK & DS Series

(Compatible with ISO 7241-1, Series B)

Applications: FHK Series sockets incorporate valves in both socket and plug halves to prevent fluid loss when the socket is disconnected. These sockets are normally referred to as "hydraulic couplings", but they are used extensively with other media where objectionable.

Vacuum Service: 27" Hg. maximum Rated pressures as defined by ANSI/B93.2-1986 based on 4:1 Safety Factor and non-shock service.

Type: FHK, Two-Way Shutoff, Both socket and plug are sealed at disconnect.

Interchangeability: Standard, most widely used, industrial interchange design. Within each series, only sockets and plugs of the same size will couple together. Compatible with ISO 7241-1, Series B.

Operation: Manual - Socket sleeve must be manually retracted to connect and disconnect.

Connect and disconnect at zero pressure for personal safety and maximum product life.

Seal Compound: Standard seals are Buna-N.

Options:

- One Way Shut-Off: Add suffix VA to either socket or plug catalog number for valve actuator.
- Straight-Thru: Add suffix LV to both socket and plug catalog number for less valve.
- Ball Lock (BL): Locks against accidental disconnect. To connect, align ball with slot. After connection, rotate sleeve to lock. To disconnect, realign ball with slot and retract sleeve.

Ordering information:

FHK Series couplings are available in RoHS compliant plated steel, brass, and 303/316 Stainless as standard. Brass couplings have double O-Ring seals (excluding 1/8") and stainless locking balls. Standard seals are Buna-N (Nitrile). Consult factory for optional seals.

All sizes can be furnished with locking sleeves designated by "BL" (Ball Lock) prefix after regular catalog numbers.

Performance:

FHK & DS Series Dust Plugs & Caps

DS Series Carpet Cleaning

FHK & DS Series Dust Plugs and Caps

Protective dust plugs and caps play a crucial role in the use of hydraulic quick couplings. Dust plugs and caps keep the mating surface clean and free of contamination and protect the critical mating elements of the coupling halves when they are disconnected. The plug is protected from damage that would make the total coupling unusable.

Note: When ordering the dust cap/plug body size must correspond to that of the socket or plug.

	DS2F2-BI	1/4"	1/4-18	Brass

Female Thread	Part No.	Size	Thread Size NPTF	Description
	2DSF2-BI	1/4"	1/4-18	Brass

Newly designed to exacting standards, our latest Carpet Cleaning ISO-B quick disconnect includes a redesigned stainless steel valve with EPDM Seal and internal components, specifically engineered to offer strong airflow, high psig and efficient performance. Field tested and subjected to rigorous cleaning applications, it has been proven to perform under pressure without leaking or failing. It is ideal for carpet cleaning equipment, car washes, pressure washers and water based hydraulic applications.

Contact factory for specific information. Socket is available with a protective cover in three different color options.

Brand - Designates **F**=Foster or **B**=Breco Part
Foster Engineering Catalog

WARNING: Cancer and Reproductive Harm Warning. For more information go to www.P65Warnings.ca.gov.

- The 6600 Series couplings feature poppet valves with solid metal perch that maintains valve alignment and prevents flow checking. Both the sleeves of the socket and plug are case hardened to make the couplings resistant to damage from brinelling and mechanical shock.
- The durable ball-locking mechanism ensures a reliable connection every time.
- These couplings have female pipe and straight thread end configurations as standard. The dimensional requirements of Series A in ISO 7241-1. Socket and plug are interchangeable with other parts compatible with ISO 7241-1.

Applications:

The versatile "6600" Series couplings are used in a wide range of hydraulic applications including construction equipment, manufacturing machinery, and in-plant systems. They can be found anywhere the fluid transfer lines need to be connected and disconnected for operation or maintenance of equipment. Rugged construction makes it a good choice for mobile applications including dump trucks, snow plows, refuse hauling, mining, asphalt paving, truck trailer connections and many more. In-plant machinery applications include hydraulic fluid, chemicals and gas lines for paper mills, steel production, and many varieties of plant maintenance and production equipment.

FF Plus Series

(Flat Face, Meets ISO 16028 Standard)

Nickel Plated Steel

316 Stainless Steel

Construction

(Sizes 06 to 25) - Carbon steel with zinc nickel plating fitted with Nitrile seals (Viton seals available)
1200 hours with no white or red rust in salt spray tests
AISI 316 stainless steel fitted with Viton seals (Other seals available on request)

Features

- Safety locking sleeve to prevent accidental disconnection
- Flat faces are easily wiped clean
- Minimal inclusion of air and contaminants during connection
- Flat face design prevents fluid loss during disconnection
- Bidirectional flow
- Offered nickel plated steel & 316 Stainless Steel
- Manufactured to ISO 16028 Standard
- Bi-directional Flow
- Multiple Thread Types: NPT and ORB
- Connect Under Pressure Series, see page 338
- Tested to 1,200 Hours of Protection from White & Red Rust

Accessories

Dust Caps and Plugs are available

Specifications

Couplers have been tested to the ISO 7241-2 Standard

Operating temperatures - Nickel Plated Steel:
(With Nitrile seals): -40° to 223°F (-40° to 106°C),
(With Viton seals): -4° to 392°F (-20° to 200°C)

Operating temperatures - Stainless Steel:
(With Viton seals): -4° to 392°F (-20° to 200°C)

		25FFPDC	1"	Dust Cap - PVC

FF Plus Series - Connect Under Pressure

(Flat Face, Meets ISO 16028 Standard)

FF10CUP

FF12CUP

FF19CUP

Features

- Designed to connect with the flat face sockets
- Flat faces are easily wiped clean
- Allows for minimal inclusion of air and contaminants during connection
- Flat face design prevents fluid loss during disconnection
- Bidirectional flow
- Connect under pressure with up to 5,067 psig (350 bar) locked in the plugs
- Sockets must have zero pressure when connecting plugs under pressure

Connects under pressure by hand, with up to 5,067 psig (350 bar) locked in the male half. The ideal choice for applications where the ability to connect under pressure is essential.

Construction

(Sizes 10 to 19) - Carbon steel with zinc nickel plating fitted with Nitrile seals
(1200 hours with no white or red rust in salt spray tests)

Accessories

Dust Caps are available for connect under pressure series

Specifications

Operating temperatures:
(With Nitrile seals): -40°F to 223°F (-40°C to 106°C)

Flow Characteristics

Contact Foster for detailed information

FF Series

(Flush Face, Meets ISO 16028 Standard)

The FF Series couplers are a two-way shut-off hydraulic coupler. Typical applications include portable hydraulic tools, railway and construction maintenance equipment, utility company field equipment and general purpose hydraulic service. The flush face technology provides for ease of cleaning, minimal air inclusion and minimal fluid loss. The arrow stamped on the coupler indicates the direction of flow for installation purposes.

Features:

- Meets dimensional and performance standards of ISO 16028 as well as HTMA* and NFPA.
- "FF" Series style double shut-off hydraulic couplings are intended for use on medium pressure hydraulic systems up to 2500 psig operating pressures.
- Combines dual flush face valving, push-to-connect operation, minimum fluid loss upon disconnect, low air inclusion and sleeve lock.
- Primary applications are with hydraulic tools where cleaner automatic connections are needed and in machine tool line connections where minimum fluid leaks can be tolerated.

*Hydraulic Tool Mfg. Assoc. and National Fluid Power Assoc.

Specifications	Size				
	1/4"	3/8"	1/2"	3/4"	1"

FVEP Screw Couplings

For High Pressure Applications

**Mobile Hydraulic Equipment
OEMs & Aftermarket**

**Connect and Disconnect with
up to 5,075 psi Residual Pressure**

- Zinc Nickel Plated Carbon Steel
- Rated for 1,200 Hours Protection Against White & Red Rust
- Large body size – 1/2" to 1-1/4"
- Operating temperatures with Nitrile Seals:
-40°F to 223°F (-40°C to 106°C)
- Screw Thread Connection Eliminates Brinelling
- Orange Seal for Proper Connection Verification
- Socket Sleeve can be Pushed Back for Access to the Mating Face
- Flat Face Design Prevents Fluid Loss During Disconnection

FH & FIH Series

(Interchange with Snap-Tite H & IH Series)

FH & FIH Series Quick Disconnect has provided years of reliable service on hydraulic/pneumatic applications in the handling of gases and fluids. The FH & FIH Series couplings are engineered to meet or exceeds MIL-C-51234. Options are available for static pressure hydraulic systems and also for pneumatic air tool use.

Type:

- FH – Two Way Shut-Off and Straight-Thru
- FIH – One Way Shut-Off

Interchangeability:

- FH Series interchanges with Snap-Tite "H" Series.
- FIH Series interchanges with Snap-Tite "IH" Series.
- Within each series, only sockets and plugs of the same size will couple together.

Operation: Manual – Socket sleeve must be manually retracted to connect and disconnect.

Options: Ball Lock (BL prefix) – Locks against accidental disconnect. To connect align ball with slot. After connection, rotate sleeve to lock. To disconnect, realign ball with slot and retract sleeve.

Seal Compound: Standard seals are Buna-N.

Rated Pressure: Rated Pressure as defined by ANSI/B93.2 – 1986, non-shock service.

Socket Features:

- Latch Mechanism
 - Manual connect and disconnect
 - Sleeves are hardened to provide maximum service life
- Material and Finish
 - Machined from solid bar stock
 - Steel components are zinc plated
- Coupled Seal
- Valved units incorporate a Teflon back-up ring to with-stand dynamic impulse

Plug Features:

- Machined from solid bar stock
- Steel plugs are hardened and zinc plated to provide heavy duty performance
- Flow - Large diameters provide for higher flow than other double shut-off quick disconnects
- Seals
 - Buna-N (Nitrile) seals are standard
 - Valve seals are crimped in place to maintain integrity during excessive flow conditions

Features:

- The "4000" Series is a proven design for use on construction equipment, agricultural machinery, oil tools, steel mill machinery, and other demanding hydraulic applications.
- Couplings feature steel ball check valves for dependability in heavy-duty hydraulic applications, within rated working pressures.
- Socket and plug are precision machined from solid barstock. A ball-locking mechanism holds the mating halves together, and critical parts are induction hardened for durability.

Specifications:

Body Size	1/4"	3/8"	1/2"	3/4"	1"
Rated Pressure (Psig)	3000	3000	3000	3000	3000
Rated Flow (GPM)	3	6	12	28	50
Temperature Range (Std seals)	-40° to +250°F				

Performance:

6100 Series

Features:

- For use on hydraulic applications with operating pressure up to 3,000 Psig
- Heavy duty, double shutoff coupler
- Connect/disconnect under pressure with minimal air inclusion and fluid loss
- Interchangeable with manufacturers' couplings
- Plugs can be bulkhead mounted

Specifications:

	Size				
	3/4"	3/4"	1	1 1/4"	1 1/2"
Dash Number	-08	-12	-16	-20	-24
* Rated Pressure (Psig)

Male Half	3000	3000	3000	2500	2500
Complete Coupling Assembly	3000	3000	3000	2750	2500
Rated Flow (GPM)	12	28	50	76	100

* Minimum burst pressure is equal to three times the rated pressure.

Not recommended for continuous hydraulic impulse applications at rated pressures.

Construction:

- Brass body resists corrosion
- Zinc plated steel wing nut
- Stainless steel springs
- Buna-N Seals

Temperature Range:

- -40° to +250° F

Performance:

W Series

[High Pressure Coupling, Enerpac Interchange]

Features:

1. Machined from solid steel bar stock for durability.
2. The "W" Series has a threaded sleeve locking mechanism, mates with matching male threads on the plug. The two halves must be manually threaded together for connection.
3. Hard, chrome alloy balls are used for valving. They are spring loaded for positive sealing of the valve.
4. The valve provides a metal-to-metal seal between the ball and a coined seat.
5. The body seal is polyurethane which resists high pressure extrusion.
6. A threaded valve retainer provides a valve stop that assures positive valve alignment.

Performance:

Applications:

The "W" Series couplings with their threaded union locking system and precision ball-type check valves, are designed for extreme high pressure applications such as found on portable hydraulic rams.

Specifications:

	SIZE
	1/4" 3/8"
Rated Pressure (psig) Static	10,000
Temperature Range (std seals)	-10° to +250°F.

Note:

Protective dust plugs and caps play a crucial role in the life of a quick coupling and no purchase of a hydraulic quick coupling is complete without the selection of an appropriate dust plug and cap.

Foster Engineering Catalog

WARNING: Cancer and Reproductive Harm Warning. For more information go to www.P65Warnings.ca.gov.

Type: FST Straight-Thru, No valve in either socket or plug.

Interchangeability: Standard industrial interchange design, most widely used in industry. Within each series, only sockets and plugs of the same size will couple together.

Operation: Manual – Socket sleeve must be manually retracted to connect and disconnect.

Options: Ball Lock (BL) – Locks socket against accidental disconnect. To connect, align ball with slot. After connection, rotate sleeve to lock. To disconnect, realign ball with slot and retract sleeve.

Seal Compound: Standard seals are Buna-N

Temperature Range: -40° to +250°F.

Performance Data Flow: Couplers have same inside diameter as nominal pipe.

Rated Pressure: Rated pressures as defined by ANSI/B93.2-1986, based on 4:1 Safety Factor and non-shock service.

Vacuum Service: 27" Hg maximum

Only Sockets & Plugs with same prefix digits connect together.
Example: 25FS & 25MPB

Seal & Fluid Compatibility Guide

Seal Material

- 1 Captive valve seal ensures "bubble tight" poppet sealing since seal is positively captured by the metal poppet to minimize seal washout or damage from high fluid velocity.
- 2 Broad range of metals and seal materials allow the use of most fluids.

Seal Compound Data		
Seal Material	Part No. Suffix	Color Code
Nitrile (Buna-N)	Std.	None
Viton (product of DuPont)	-101	Blue
Neoprene	-102	Red
Ethylene Propylene	-103	Black
Silicone	-104	White

To Order: Add seal compound part number to the end of coupling part number.

Example: H4S-103, 1/2" NPT, FHK Series, steel socket with ethylene propylene seals (-103).

Note: Please consult with your Foster representative or the factory for any media not listed.

Optional Seal [Ordering]:

Buna-N seal is standard. Alternate seals are specified by adding the appropriate suffix to the catalog number. For example, 3003 socket with Heat Adder is 3003H

Optional Seal Material

Service	Construction	Seal	Temperature	Suffix
Air, Vacuum, Grease & Oil	Brass & Steel	Buna-N	-40° to +250°F	none
Water	Brass & S/S	Buna-N	+32° to +100°F	W
Hot Water	Brass & S/S	Viton	-15° to +400°F	HW
Steam	Brass Body, Brass Sleeve, & Stainless Steel Valve	Ethylene Propylene	-40° to +300°F	S
Heat	Brass & Steel	Viton	-15° to +400°F	H
Less Valve	Brass & Steel	Buna-N	-40° to +250°F	LV
Dill Valve Series 3 Only	Brass & Steel	Buna-N	-40° to +250°F	D

Be Safe When Installing Quick Couplings Installation Of Reusable Hose Couplings

1 Trim the end of the hose as square as possible.

2 Insert Hose completely into ferrule and make note of how deep the hose goes.

3 Mark the point of full hose insertion depth with a piece of tape.

4 Verify tape line is correct for full insertion.

5 Add a bit of lubricant to the reusable hose barb before inserting into the ferrule.

6 Turn reusable hose barb into ferrule ensuring hose stays completely inserted.

7 Tighten reusable hose barb into ferrule ensuring hose stays completely inserted.

8 Completed connection, Use marker applied in **step [3]** to ensure hose is completely inserted.

Be Safe When Installing Quick Couplings Installation “Push-On” Hose

1 Trim the end of the hose as square as possible.

2 Grip the Plug or socket firmly and Push On hose.

3 Completed connection, ensure that the hose is completely inserted.

Be Safe When Installing Quick Couplings

Inspection and Maintenance

Plugs:

- Inspect for cracks, chips, dings or other damage.
- Clean as necessary using water and a mild detergent. External buildup may be removed using a wire brush, taking care not to mar the surface of the plug.
- Replace any damaged plug.

Sockets:

- Inspect overall for cracks, dents or other damage.
- Inspect inside socket for damage or debris.
- Actuate all moving parts to ensure they operate freely with no scraping or binding.
- Clean as necessary using water and a mild detergent.
- Replace any damaged socket.

Assemblies:

- Install the plug into the socket, making sure the parts connect easily and hold firmly.
- Disconnect coupler, check that the plug and socket release easily and smoothly, with no scraping or binding.
- On BL (ball lock) and SL Series (with locking sleeve), rotate sleeve to the locked position and attempt to disconnect, pulling firmly to ensure the coupler stays connected.
- Rotate sleeve to the unlocked position, and ensure the coupler disconnects easily.
- If any damage, binding or unintended disconnecting is found, both the coupler and plug should be replaced.

Be Safe When Installing Quick Couplings

Installation of Tapered Thread Connections

1 Apply 1½ to 2 wraps of PTFE tape, starting one or two threads from the lead edge, in a clockwise direction. For type 316 stainless steel, be sure to use stainless grade tape.

2 Check threads to make sure there is no damage and that tape is properly installed. Align threaded connections and carefully begin threading the two halves together.

3 Finger tighten the connection.

4 With **even and smooth** force applied, wrench tighten according to the "Turns From Finger Tight" values listed in the table below.
DO NOT OVERTIGHTEN!

5 Coupling is ready for use.

SAE Size	NPFE Thread Size	Turns from Finger Tight
-4	¼" - 18	2
-6	⅜" - 18	2
-8	½" - 14	2
-12	¾" - 14	1.5
-16	1" - 11½	1.5
Do Not Overtighten!		

Be Safe When Installing Quick Couplings Safety Exhausting Coupler Operation

- 1** To Disconnect;
Begin by holding the hose with three of your fingers leaving your thumb and index finger free.

- 3** After pulling the sleeve, the plug will move out of the couple slightly. Continue to hold the hose and coupling sleeve until **all air is fully exhausted**.

- 2** Grab the sleeve with your thumb and index finger and begin to pull the sleeve towards the palm of your hand.

- 4** After the line is fully exhausted, you are able to safely separate the plug from the coupler.
